Continuation of 11, does NOT place the application in condition for allowance because: Applicant contends that the original description of applicant's invention along with claims and drawings have remained the same. The examiner respectfully disagrees. As noted in the previous office action, none of the elements and/or limitations requested have be pointed out in the spoffication. The drawings that applicant relies upon do not show the elements as discussed in the previous office action. Again, as noted in the previous office action filed 8 December 2011, new claim 31 seems to add further limitation sthat were not described nor disclosed in the specification as orginally filled. As an example, the examiner notes that the drawings filled on 8 December 2011 where not acceptable nor entered because the new figur 1 contained elements that where not supported in the spoffication and the orginal drawings as orginally filled. Figure 10 was also considered new matter since there were only 2 figures as orginally filled and entry regarding any new or other drawings throughout procecution have not been entered. Applicant provides further explanation or definition regarding the invention which is helpful in understanding of the invention, however no support or evidence has been cited in the orginal specification as regested. Furthermore, the examiner again request applicant to point out the limitations of the claimed elements as noted in the previous office action.
